

Axon Engineering (legal name Axon Michanologiki S.A) was founded in 1985 as a **precision engineering manufacturing company**. Axon employs some of the most skilled professionals in our industry combining **engineering expertise** and over **36 years of technical experience**.

Our aim is to offer our customers a complete **Engineering solution** by maintaining good lead times, **on-time delivery, quality** and **reliability** at competitive prices. We provide our customers all the necessary services of a "one stop shop" supporting them through the full production cycle, all the way from sourcing and manufacturing to assembly, delivery and after sales support of the products.

Axon manufactures a wide range of products for companies in sectors such as aerospace, defense, electronics, naval, optics and telecommunication. One of our areas of expertise is built to print maintenance tooling, ground support equipment and fabrications for the commercial and military aerospace industry.

Capabilities

- Project Management
- Design (CAD/CAM), R&D
- CNC & Conventional Machining
- Welding per ASME Section IX / EN Standards
- Non-Destructive Testing / Load & Pressure Testing & Inspection
- Surface Treatments & Special Finishing Processes (Nylon coating, Chromate Conversion - Alodine, Black Oxide, Phosphate, Paint)
- Assembly & Special Fabrications Area
- International Procurement and Delivery

Quality

- ISO 9001:2015 Certified by TUV Austria
- AS9100 D Implemented - Certification in process
- CMM Mitutoyo Romer Absolute Arm
